## Work Experience

From December 2017

### GROUP ICT INFRASTRUCTURE MANAGER

Reporting to Group CIO, I am responsible for the ICT infrastructures spread over 17 plants, with 1400 workstations and over 120 servers. Accountable for security, telecommunications, networking, infrastructure and collaboration services, acting as ICT architect for designing the architectural IT solutions and Project Manager in the implementation and improvements projects, according to business needs. Responsible for the global ICT Governance, performance and KPI of infrastructural services, Operations and Service Desk services.

Team: 8 members in EMEA, 6 in APAC.

UFI Filters s.p.a, Automotive, Verona

From February 2017  
to November 2017

### IT SYSTEM ARCHITECT

Responsible of designing IT solutions according to business and Customers needs in large enterprise environments; analysis of needs, evaluation and design of solutions, drawing the technical proposals are the core tasks in which I'm accountable, up to the project delivery working as Team Leader.

Architect and Team Leader of a project about a 'Mail Inspection and Protection System': it involves several technologies and spreads on 60 servers, 2 geographical sites (for HA and DR) and delivers the e-mail service to over 40.000 users in EMEA area, with strong and strictly attention to Cyber Security.

Team: up to 9 members.

Leonardo Company, Information and Defense, Genoa (employed by AizoOn srl, ICT, Turin)

From July 2015  
To February 2017

### SENIOR TECHNICAL SPECIALIST

Expert on cloud products such as Office 365 and Windows Azure (IaaS, SaaS) but also in Hyper-V and System Center farms, in Skype for Business and Exchange; I managed and delivered several projects about cloud solutions for top enterprise Customers and Public Administrations. I also worked as System Administrator with duties in networking, server administration, 2<sup>nd</sup> level support and so on. Some of projects in which I worked:

- Review and consolidation in a single domain of 2 trusted Active Directory with over 10.000 users involved. Assessment, requirements analysis, design of migration and consolidation solutions, operating tools implementation, writing of architectural and process documentation. Delivery of pilot validation project and training to local IT staff.
- Migration of over 1.100 users to Office365 with implementation of AADConnect and ADFS for SSO synchronization: design, plan and implementation of solution with follow-up tasks.
- Upgrade of sync technology from 'DirSync' to 'AADConnect' with introduction of SSO based on ADFS (in HA config) in large environment with over 3.500 users;
- Design and implementation of VDI infrastructure Hyper-V based for VMs deployment to over 200 users on two different locations, including High-Performance graphics features.
- Design and Implementation of new Private Cloud based on 3-node SystemCenter VMM and Hyper-V cluster, migration of VMs from older VmWare infrastructure, HA and optimization of resources.
- Design and Implementation of Skype for Business architecture for Enterprise Voice and Unified collaboration, with strong integration with VDC, Asterisk voice systems, Exchange, SharePoint and Skype personal environments.

SOFT JAM s.p.a., ICT, Peschiera Borromeo (MI)

From January 2007  
To June 2015

## INFRASTRUCTURE MANAGER AND SYSTEM ADMINISTRATOR

Responsible of a medium sized ICT architecture (about 800 workstations, 60 servers, 12 permanent sites and 30 temporary sites): accountable for providing, managing, maintaining and assuring IT services according to the business needs; **I dealt with** IT Governance and Management, Security, TLC and networking, Infrastructure and Collaboration services. **I headed** the Service Desk & Operation Team, involved in all day-by-day and scheduled activities targeted to operate the IT services to internal Customers.

**Responsible** since 2012 **of IT budget** and ICT internal processes managed according ITIL guidelines.

Extensive experience in cross-departmental relationships, in management of resources, tasks and priorities. Relevant experience in design, plan and **project management** about new IT services and products needed by Business plans. I managed with success many projects about IT infrastructure, onboarding of acquired BU from other Companies or – in the last years – in spin-off or reorganization matters. I also had experience in management of software agreements, **Security and Privacy** compliance rules. Team: from 2 to 9 people.

Some of my Project and accomplishments:

- Spin-off: partition IT Corporate Infrastructure in four different IT organizations, with relative tasks management and start-up, coaching of the new IT Staff.
- Costs decrease: reduction of over 20% per annum of IT costs in two years, thanks to optimization of processes and resources with ITIL guidelines, improving and consolidating existent technologies.
- Office365 onboarding: upgrade of On-Premise Servers and Hybrid configuration, migration of mail services. Strong reduction of administrative efforts and management costs of Corporate IT system.
- Infrastructure Management: design of architecture and implementation of needed products (CM, OM, DPM, VMM). Implementation of a Hyper-V Private Cloud based on 5 hosts with HA and DR site.
- Datacenter: sizing, design, planning and building management of new 70sqm Datacenter, using 'Green technologies' and DC Best Practices, with Tier-III guidelines; moving of IT Services with no down-time to Users.
